

Molten Metal Systems

# Safety Data Sheet

(Information provided in this SDS has been prepared by competent and appropriately qualified and trained persons in accordance with The Morgan Crucible Company plc compliance procedures. It meets the requirements of the following standards and regulations: American National Standard ANSI Z400.1-2004, Australia National Code of Practice NOHSC:2011(2003), European Council Regulation (EC) 1907/2006 Annex II, United Nations Globally Harmonized System for Classification and Labeling of Chemicals Annex 4 (2005), and USA OSHA Hazard Communication Standard.)

<b>SDS No: D1</b>	<b>Date of First Issue: 15/01/2013</b>
<b>Glazes &amp; Paints</b>	<b>Date of Last Revision: 15/01/2013</b>

## Section 1 – Products and Suppliers

**Identification of the Product: OBA LTP Low Temperature Painting**

**Use of the Product:**

Paints used for the protection & cosmetic treatment of Crucibles & Heater Sheaths used for the holding & melting of metals for casting & other metal treatment processes

### Suppliers and emergency contact information:

Morgan MMSGmbH	Morganite Crucible Inc	Morganite Crucible (India) Ltd	Morganite Brasil Ltd	Diamond Crucible Co Ltd	Morgan Molten Metal Systems (Suzhou) Co. Ltd.
Noltinastrasse 29	22 North Plains	Works B-11, MIDC	Av do Taboão, 3265	212-C, GIDC	No. 108, Tongsheng Rd Shengpu

## Section 2 – Hazard Identification

### Emergency overview:

The components of these products are not classified as hazardous according to REGULATION (EC) No 1907/2006.

**Chronic health effects:** none

**Short-term exposure effects:** none

**Physical hazards:** none

### Potential hazards during use;

Splashes may cause irritation to skin and eyes.

Once installed and commissioned, product may release dust if abraded, broken or otherwise damaged through mishandling

## Section 3 – Hazardous Components

**Description:** Water-based colored suspension, supplied in sealed containers

**Composition:** The components of these products are not classified as hazardous according to REGULATION (EC) No 1907/2006.

COMPONENT	% by weight	EINECS number	CAS number	Symbol	R Phrases
Water	20-40	231-791-2	7732-18-5	N/A	N/A
Glass Frit composed out of: (SiO <sub>2</sub> ) (Al <sub>2</sub> O <sub>3</sub> ) (Alkali oxides) (Boron oxides)	30-50  (30-50) (20-30) (10-20) (10-20)	266-046-0	65997-17-3	N/A	N/A
Acrylic Emulsion	0-30	Mixture	Mixture	N/A	N/A
Pigment	<20	215-570-8	1332-37-2	N/A	N/A
Organic Additives	<10	232-674-9	9004-34-6	N/A	N/A

## Section 4 – First Aid Measures

### Inhalation:

Symptoms of Exposure: Dryness in throat or coughing due to exposure to breathable dust.

First Aid measures: Remove to fresh air, if symptoms persist seek medical attention.

### Skin Contact:

Symptoms of Exposure: Drying of the skin after contact with wet material. Mechanical irritation to skin due to exposure to dust.

First Aid measures: Remove contaminated clothing. Wash area of contact thoroughly with water. Seek medical attention.

### Eye Contact:

Symptoms of Exposure: Mechanical irritation to eyes due to exposure to wet material or dust.

First Aid measures: Wash eyes immediately with large amounts of water. Do not rub eyes. Seek medical attention.

### Ingestion:

Symptoms of Exposure: Possible stomach problems due to ingestion of wet material or dust.

First Aid measures: Seek medical attention.

## Section 5 – Fire-fighting Measures

These products are non-flammable.

Packaging and surrounding materials may be combustible.

Use extinguishing agent suitable for packaging and other materials stored nearby.

## Section 6 – Accidental Release Measures

- Personal Precautions:** Ensure good ventilation to area. Avoid creating airborne dust. Spillages can create slippery conditions underfoot. Wear personal protective equipment as detailed in section 8.
- Environmental Precautions:** Clean up spillage immediately. Ensure material does not enter drainage system.
- Methods for cleaning up:** Absorb liquid spillage with inert absorbent material. Rinse residue with water. Use wet sweeping or vacuuming to clean the work area, do not use compressed air or dry sweeping. If vacuuming, the vacuum cleaner should be equipped with a high efficiency particulate filter.

## Section 7 – Handling and Storage

- Handling:** Take care not to damage container. Store mouth up and close off when not in use.
- Storage:** Store in dry conditions away from strong heat sources.
- Specific Use:** For safe & efficient use of the product, working practices must comply with the recommendations described in the relevant product datasheet, available from the manufacturer.

## Section 8 – Exposure Controls and Personal Protection

**Exposure limits and guidelines (many jurisdictions have exposure limits and control guidelines for substances not listed elsewhere as hazardous - consult and comply with local regulations where they exist):**

**Exposure Limit Values:**

Industrial hygiene standards and occupational exposure limits vary between countries and local jurisdictions. Check which exposure limits apply to your facility. In the absence of exposure information, or if no regulatory dust or other standards apply, the manufacturer recommends the control of breathable dust exposures to the UK limit for nuisance dusts of 4 mg/m<sup>3</sup>/8hour time weighted average (TWA) or less.

**Exposure Controls:**

Review your working practices in order to identify potential sources of dust exposure. If necessary conduct personal air monitoring. Where technically and economically feasible, use engineering controls. These may include local exhaust ventilation & equipment to remove airborne dust or materials.

**Personal Protective Equipment:**

- Respiratory Protection:** Wear approved respirator when dust or spray concentrations may be above the exposure limit.
- Hand Protection:** Wear protective gloves.
- Eye Protection:** Wear chemical resistant glasses with side shields or other appropriate forms of eye protection.
- Skin Protection:** Wear safety shoes and appropriate work overalls when working with the product.

**Section 9 – Physical and Chemical Properties**

- Appearance:** Colored Viscous Suspension
- Odour:** None
- pH:** 6-10
- Boiling Point:** 100°C
- Flash Point:** Non-flammable
- Density Range:** 1.3-1.9gcm<sup>-3</sup>
- Water Solubility:** Miscible with water
- Volatile Organic Content (VOC):** 20g/l
  
- \*Melting point OBA-LT** 700°C

**Section 10 – Stability and Reactivity**

- Chemical Stability:**  
Stable under conditions of normal use.
  
- Conditions to Avoid:**  
Rapid heating of damp material from incomplete or inadequate dry out during commissioning on porous substrate.
  
- Materials to Avoid:**  
Strong oxidizing agents, strong acids, strong bases.

**Hazardous Decomposition Products:**

At elevated temperatures, water vapor, steam and VOCs will be emitted.

**Section 11 – Toxicological Information**

**Inhalation:** No known effect.

**Skin Contact:** No known effect.

**Eye Contact:** No known effect.

**Ingestion:** No known effect.

**Section 12 – Ecological Information**

These products are inert materials, which remain stable over time.

No ecological concerns have been identified or are anticipated.

**Section 13 – Disposal Considerations**

Check local, regional, state or provincial regulations to identify all applicable disposal requirements.

Contamination during use or chemical additions to the product may alter the disposal requirements.

**Section 14 – Transport Information**

Not classified as dangerous goods under IMDG (sea), ADR (road), RID (rail), or ICAO/IATA (air) regulations. Consult local, regional, state or provincial regulations.

**Section 15 – Regulatory Information**

There are no known local, national or international regulations or restrictions that apply to the manufacture, use or disposal of these products. Consult local authorities if additional information is required.

**Section 16 – Other Information**

For best performance & recommended handling & storage practices refer to the relevant product datasheet, available from the manufacturer.

**Reasonable care has been taken in the preparation of information contained in this Safety Data Sheet, and the information is provided in good faith. Morgan Carbon Division assumes no responsibility as to the accuracy of information drawn from the stated sources. No warranty, expressed or implied, is made.**
